Subject: Reference Letter - Emre Küçükgöçer

To Whom It May Concern,

I am writing this letter to support the career path and professional job/internship applications of Emre Küçükgöçer, a student in the Department of Computer Engineering at Sivas Cumhuriyet University. I know our student closely through the courses I have taught him in our department and through his proactive attitude in academic processes.

Throughout his education, Emre Küçükgöçer has not been content with theoretical knowledge alone, and has shown outstanding effort in putting the engineering understanding he has acquired into practice. In particular, his vision in artificial intelligence, deep learning, and modern software architectures, his analytical problem-solving skills, and his interest in innovative projects (TÜBİTAK-funded studies, national hackathon awards, etc.) are among the qualities that make him stand out in our department.

In addition to his technical background and algorithmic thinking skills, thanks to his capacity for rapid learning, his aptitude for teamwork, and his enthusiasm for following current technologies, he is able to adapt quickly to any work environment he joins. I have full confidence in his ability to overcome complex problems, whether by independently carrying out a project from start to finish or as part of a professional R&D; team.

I believe that in the technology-focused processes he will undertake within your organization, he will quickly take the initiative and provide high added value to your company and team. In light of all these qualities, I strongly recommend Emre Küçükgöçer for the positions you will be considering him for.

Should you require more detailed information about him, you may reach me at any time through the contact details below.

Sincerely,

Prof. Dr. Hidayet Takcı, Sivas Cumhuriyet University

Faculty of Engineering, Department of Computer Engineering
